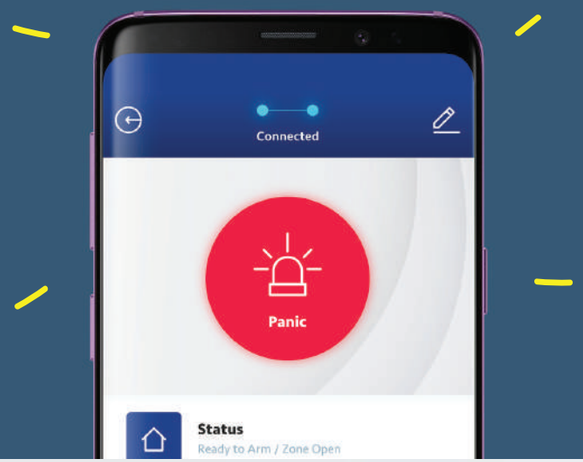
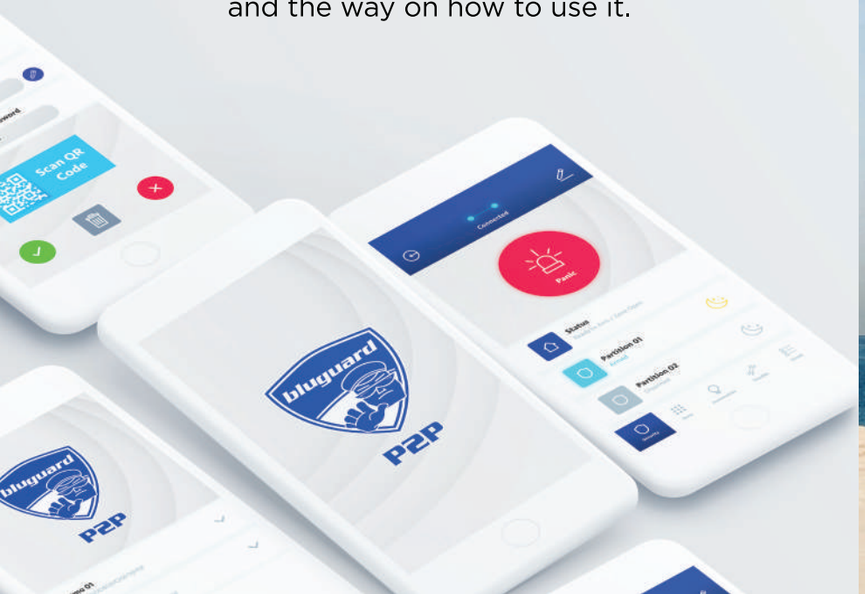
Mobile Remote Control

A 24/7 panic button in your mobile app that will trigger your house alarm system in an event of emergency.



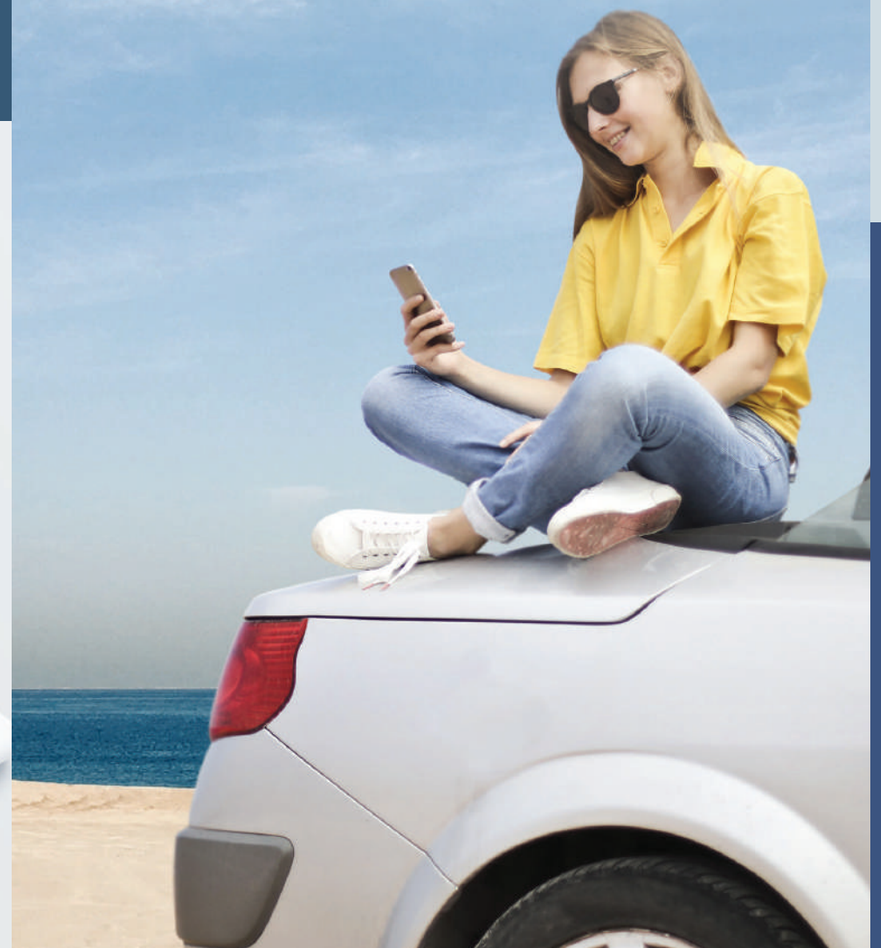
User Friendly

Kid friendly icons and simple app interface make it easier for people to understand the functions and the way on how to use it.



Get Notified. Anytime, Anywhere

Always get notified regarding your house situation even when you're outside the house or in another country.



More Than Security

Turn your mobile into remote control mode as it can control your security and also your home automation.

*additional module might be needed.

Warning Siren

A notification with voice will always alerts you whenever your alarm triggered.
