

**Model : BLUGUARD CONNECT**

The Bluguard Connect module allows you to effortlessly manage and monitor your premises alarm and smart home systems through the intuitive Bluguard Connect Application. Designed exclusively for use with Bluguard's 9-zone and 16-zone alarm panels, this module allows seamless integration and control. With this app, you can monitor your alarm status and control smart devices like lights, curtains, fans, air conditioners, and TVs—all from your smartphone. Receive immediate push notifications in case of intrusion, even if the Bluguard Mobile application is turned off. The system also provides automatic updates on power and battery status, ensuring continuous peace of mind.

**FEATURES****1. Security Control**

Control over the security alarm system, arm/disarm from the mobile phone

**2. Home Automation Control**

Switch on/off home appliances from mobile phones

**3. Push Notification**

Receive message even when you turn off the Bluguard Mobile Apps

**4. System Status Report**

Receive notification from system status checking such as power/ battery failure

**5. Event Log View**

Report viewing on the event log
